PROFESSIONAL SUMMARY

Full Stack Developer (MERN) with hands-on experience building scalable web applications and RESTful APIs. Demonstrated ability to learn rapidly — currently applying cloud and DevOps concepts through AWS and Google Cloud. Strong foundation in Data Structures & Algorithms with active problem-solving practice on LeetCode. Experienced in collaborative, team-based development with a focus on clean code, feedback-driven improvement, and shipping reliable software.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science

Expected 2027

Galgotias College of Engineering and Technology, AKTU

Senior Secondary (Class XII) — CBSE

2023

Renaissance School, Bulandshahr

Secondary (Class X) — CBSE

2021

Renaissance School, Bulandshahr

TECHNICAL SKILLS

Languages	JavaScript, Java, Python
Frontend	React.js, HTML5, CSS3, Bootstrap
Backend	Node.js, Express.js, Spring Boot
Databases	MongoDB, MySQL
DSA	Arrays, Linked Lists, Trees, Graphs, Sorting & Searching
Core CS	OOP • DBMS • OS • Computer Networks • System Design Basics
Cloud / DevOps	AWS (EC2, S3, IAM — Learning), Docker (Learning), Google Cloud, Git, GitHub, Linux
Cybersecurity	OWASP Top 10, Network Security Fundamentals, Authentication & Authorization
Tools	VS Code, Postman, GitHub
Currently Learning	AWS Solutions Architecture, Docker Containerization, System Design Basics

EXPERIENCE

Full Stack Development Virtual Internship (MERN Stack)

Feb – April 2026

TheSmartbridge

Remote

- Developed and integrated 10+ RESTful APIs using Node.js and Express.js, managing data through MongoDB and Mongoose with full CRUD operations.
- Built responsive React.js frontend components, implemented JWT-based authentication, and maintained database connectivity across the full stack.
- Collaborated with a team of 4 developers, participated in code reviews, and incorporated feedback to improve code quality and meet sprint deadlines.
- Applied Git/GitHub workflows for version control, conducted API testing via Postman, and gained hands-on experience in deployment fundamentals.

Cloud & AI Program Participant | [Google Cloud Arcade](#) — [Google Cloud Skills Boost](#)

Apr – Jun 2026

- Completed 15+ cloud and AI learning challenges, earning skill badges across Google Cloud services including IAM, networking, security, and infrastructure management.
- Gained hands-on experience deploying, configuring, monitoring, and troubleshooting cloud resources through practical labs.

- Applied cloud security concepts and infrastructure best practices in real-world simulation environments.

PROJECTS

Project 1

Smart Meet – Video Conferencing Application

- Built a real-time video conferencing platform supporting peer-to-peer media streaming with sub-200ms latency using WebRTC and Socket.io for up to 10 concurrent participants.
- Implemented secure meeting room creation, participant management, and real-time signaling with unique room ID generation.
- Delivered a fully responsive UI optimized for cross-device compatibility, reducing UI-related bugs by standardizing component structure in React.

Project 2

MediScan - Lightweight CNN Medical Image Classifier

- Designed and trained a CNN-based medical image classification model achieving ~89% accuracy on a dataset of 2,000+ labeled medical images.
- Applied image preprocessing, data augmentation, and hyperparameter tuning to improve model generalization and reduce overfitting by 15%.
- Evaluated model performance using precision, recall, and F1-score metrics to ensure reliable and consistent disease prediction output.

CERTIFICATION

1. Cyber Job Simulation — Deloitte
2. Technology Job Simulation — Deloitte
3. ReactJS — Infosys Springboard
4. Java Programming Fundamentals — Infosys Springboard
5. Spring 5 Basics with Spring Boot — Infosys Springboard
6. Data Structures and Algorithms using Python – Part 1 — Infosys Springboard
7. Cyber Security: Understand Threats and Prevent Attacks — Alison
8. Discrete Mathematics — NPTEL
